CalSTAT Model Leadership Site-Literacy

4 Easy Steps to an Effective Student Literacy Program

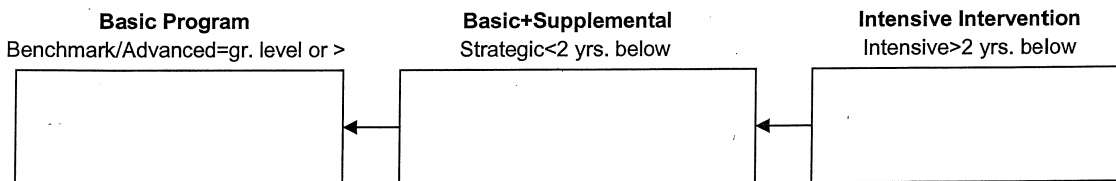

Step 1: Align Basic Language Arts Program to California Framework/Standards.

Step 2: Use assessment data to id student needs & determine appropriate program.

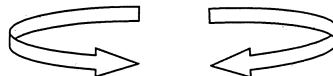

Step 3: Implement state adopted Basic and Intervention Programs as well as state approved, research-based supplemental programs for Strategic readers.

A rotating block, master schedule allows for daily instruction in math and language arts, provides additional learning time for Strategic and Intensive readers, and supports program fidelity.

Step 4: Monitor/assess all students to determine student growth, additional needs, and program effectiveness.

Flexible grouping allows students to move into and out of programs as needed based upon assessment results.
